POWDER COATED CABINET DOORS

The application of DuraSeam™ powder coatings to Medium Density Fiberboard (MDF) and Particleboard (PB) provides users of engineered wood products a durable, environmentally friendly and cost effective alternative to decorative overlays and liquid finishes.

End Uses:

- Kitchen cabinet doors
- Drawer fronts
- Garage storage
- Commercial cabinets
- Lockers
- Medical cabinets

Benefits Include:

- Endless color selection
- Durable finishes
- Seamless edges that will not delaminate and function as a barrier to VOC emissions
- Finishes that contain no volatile organic compounds, lead or solvents
- Antimicrobial coatings that help stop the spread of bacteria on powder coated MDF
- Various finishes including textures, smooth low gloss, clear coats and specialty coatings
- Greater design flexibility
